

Be a part of Culture Change!

Join the growing community of Skilled Nursing facilities who are trying new approaches for person-centered care. Aromatherapy is proven to significantly ease stress, reduce pain and anxiety, improve cognitive function, and overall brighten someone's day. Staff and families appreciate the ability to provide a more holistic health care experience!

Ready to start your Aromatherapy Program?

Safety, staff education, and intelligent use of essential oils are critical factors when using aromatherapy in healthcare settings. I know what it takes to implement a successful and safe program designed to meet the needs and therapeutic goals of your residents.

We are confident that our programs have the potential to improve quality measures, reduce the use of antipsychotic medications, reduce pain scores, and enhance the overall quality of residents lives. This is a program you can be proud of during the survey process!

What our Clients are saying . . .

"I just have to tell you, the VA survey process is just finishing up here today and they LOVE the aromatherapy program. They love the patches the most - they mentioned the Aromatherapy Patches showed "dignity" as compared to gauze or cotton balls taped to shirts" Alicia, RN, CCP, RAC-CT Veterans Home

"Our greatest benefit has been that our quality measures have dropped in the past 2 years, from triggering at 34% to 10.2%!"
Cindy, Wishek Living Center, Quality Assurance Director

About Jodi

Jodi combines 16 years of experience as a Certified Clinical Aromatherapist, Educator, and Holistic Therapist.

She delivers evidence-based, compliant, and sustainable aromatherapy programs to health care settings, both in long and short-term care.
